Nurse Practitioners and Physician Assistants are health care professionals licensed, or in the case of those employed by the federal government, they are credentialed to practice medicine with physician supervision.

As part of their comprehensive responsibilities, NPs and PAs conduct physical exams, diagnose and treat illnesses, order and interpret tests, counsel on preventive health care, assist in surgery, and write prescriptions. Within the physician to mid-level relationship, nurse practitioners and physician assistants exercise autonomy in medical decision making and provide a broad range of diagnostic and therapeutic services. This practice may also include education, research, and administrative services.

Why go anywhere else when the care you need is close at home!
